Art Unit: 1722

1. The following is a quotation of the first paragraph of 35

U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 28-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention.

New claims 28-34 all require a spacer member without openings. Any negative limitation or exclusionary proviso, such as "without openings" must have a basis in the original disclosure. Ex parte Grasselli, 231 USPQ 393 (Bd. App. 1983). The mere absence of a positive recitation is not basis for an exclusion. MPEP 2173.05(i). The originally filed disclosure of the instant application does not recite that the spacers do not have any openings. Moreover, the drawings cannot be relied on for the basis of this limitation because it is readily apparent that the drawings were not meant to be taken as a complete illustration of the define tool, but rather merely

representative and thus could comprise additional things such as openings (note for example, tool 10 is described as a non-limiting example of the tool at p. 7, ll. 10 and 11). Thus, the reciting of the spacer members as not having any openings presents new matter.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 28 is rejected under 35 U.S.C. 102(b) as being anticipated by Vandergrift (U.S. Pat. No. 1,539,887; previously of record).

Vandergrift discloses a tool comprising a first and second members (1 and 2). Solid spacer members (7) are coupled to the first and second members while cooperating with the first and second members to form a tool having cooling passages (8).

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is

Art Unit: 1722

reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
